Toronto Jewess Shot by the Man She Refused.

Murderer Shoots Self; Will Likely Die

Toronto, March 10.—Issae Estrine, a young Hebrew cloakmaker, yesterday atternoon shot and killed his sweetheart, Annie Garalick, and then attempted to commit suicide by firing two bullets into his own body. The body of the girl is lying in the City Morgue, where an inquest will be held. Estrine is in the General Hospital. Ho has a slight chance of recov-

tal. He has a slight chance of recovering.

The cause of the tragedy was the girl's retusal to mary Estrine. Her reason was that he had a wife and family in Russia. Flading her obdurate, his entreaties turned to threats, which culminated in the murder.

The scene of the murder was on Adelaide street west, opposite 412, a house occupied by a number of Poles. The man met the girl's shortly after 1 o'clock, as he was returning to work. According to ere-vitanesses, the two early talking agreeably. The girl was on the way to see her brother, who was working in a store at 466 Adelaide street. Just as they remove the trained street, but as they remove the man pulled a revolver from his pocket

Matter of Pride

ITALY, as you are motoring, perhaps in the Eternal City, with the gentleman to whom you have had letters of introduction, he will refer with evident satisfaction to the good points of his home-made "Itala" car, point out maybe, its ease of riding or its special adap-tion for climbing and descending the miles after miles of steep grades of the Italian and Swiss Alps.

GERMANY your Teutonic friend will indicate with a glow of honest pride his reasons for pleasure with his smooth running, powerful "Mercedes."

BELGIUM the owner of a "Minerva" Knight Engine car will, perhaps, show you the long list of "Minerva" triumphs in speed contests through the mountain districts of his own and ad-

FRANCE the fastidious Parisian will glow with pleasure as he tells you of his "Panhard" or his "Benault" which, after he has paid his duty on his gaso-line in Paris, sweep over the straight, smooth roads of France with an insist-ent rhythmical rush.

ENGLAND your somewhat reticent John Bull friend, without saying much, will act in a way to indicate to his Royce" are good enough for little Eng-Royce" are good enough for little Eng-land, having regard to their elegance of finish, smooth running engines, and low frames, suitable to the delightful English roads, with their smooth sur-faces, always in good repair.

THE UNITED STATES the Detroiter takes just pride in showing off his "Packard," the Buffalonian his "Pierce-Arrow," and the Clevelander his "Stearns-Knight."

We say "All honor to them!" They have the cars, and they have the attitude of mind—

"Such is the patriot's boast where'er we roam, His first, best country ever is at home."

The Russell Motor Car Co. now submits, with de-ference, but also with great confidence, that it has done its part, and that the fair-minded and alert cone its part, and that the fair-minded and alert Canadian need not curb his enthusiasm for his Can-adian-made car, but may point out, as a matter of considerable pride to him as a Canadian, that his "BUSSELL!" is the full peer of—the best cars of other countries, and that it has some features that make it, beyond all others, the ear for Canadian roads. The Rusell Meter Cer Co confidently sak you to examine their four-cylinder and six-cylinder cars, cquipped as they are with electric self-starters, electric lamps, left-hand drive, etc., and finished, and upholatered, and appointed with the utmost elegance and comfort, and propelled by their silent-running and powerful Canadian-made Knight engine. They sak you to compare these distinctive cars, not with cheaper cars, nor only with cars selling on the same price-level, but with the very best cars of foreign make.

We have been too good Canadians to be satisfied with anything but the best for Canada. We feel sure that a sufficient number of intelligent and appreciative Canadians will be found to own "Bussell" cars to warrant us in persisting in our determination to supply only the very best ears that Canadian brains and Canadian mechanics can produce.
